

# CUSTOM KILN ACCESS RAMP

Access is the first point in Circle of Refractory Maintenance

# CUSTOM KILN ACCESS RAMP FEATURES & BENEFITS

Ramps get personnel and equipment in and out of kiln safely. Each ramp is **custom designed** by certified professional engineers, made with **high grade 6061 T6 aircraft aluminum**, strong as steel and half the weight. The final drawings are submitted for approval by the customer.

**Lightweight T6 aircraft aluminum** construction is easy to handle and install. **3/8" (9mm) non-skid diamond plate decking**. Guard rails are removable. Radiused nose matches kiln. Designed to **support 15,000lbs (6,804kg)** live load with a **3:1 safety factor**. Matching personnel ramps available.

**Lifting lugs** are designed into every ramp to maximize use of forklift for installation. Assembly is easy with **modular sections**. Most ramps install in **less than an hour**.

Stackable modular design for easy installation and storage.
